

Priya Bhattacharya

SUMMARY

Self-motivated and results-oriented individual with a strong passion for web development, continuous learning, and emerging technologies. Known for combining analytical thinking and creativity to deliver user-friendly, responsive solutions in fast-paced environments. Demonstrates a solid foundation in programming and a track record of academic excellence and innovation.

EXPERIENCE

Web Development Intern

Oasis Infobyte – Mumbai, India | Nov 2023 – Dec 2023

Contributed to multiple frontend development projects, gaining hands-on experience in building responsive and user-centric web applications.

- Designed and developed websites with a focus on polished user interface design, interactive functionality, and SEO optimization.
- Built fully responsive layouts optimized for both desktop and mobile using HTML, CSS (Flexbox/Grid), and JavaScript.
- Implemented form validation, event handling, and DOM manipulation to enhance interactivity.
- Deployed projects using Netlify, gaining experience in version control (Git/GitHub) and modern deployment workflows.

PROJECTS

- Full-Stack Travel Blogging Platform [Group Project] – Developed a comprehensive web application that enables users to create, manage, and engage with blog content efficiently. The platform leverages modern web technologies to provide a seamless, responsive, and user-friendly experience. Contributed to the frontend development by designing and implementing interactive, responsive pages using HTML, CSS (Tailwind), and JavaScript. Collaborated with backend developers to integrate RESTful APIs for dynamic content rendering, and actively participated in agile development using Git and GitHub for version control.
- News Website – Developed a fully responsive news aggregator web application which delivers real-time news content through integration with the NewsAPI.org. The application features dynamic rendering of news cards via JavaScript template cloning, enhancing both performance and user experience through efficient DOM manipulation. Users can interact with intuitive search functionality and category-based filtering (such as IPL, Finance, and Politics) to retrieve relevant articles with minimal latency. Through this project, gained practical experience working with REST APIs, asynchronous JavaScript (fetch, async/await), and real-world JSON parsing—demonstrating skills directly aligned with Amazon's software development standards.

CONTACT

Address: Kolkata, West Bengal

Phone: +91-8282927729

Email: priyabhattacharya2005@gmail.com

TECHNICAL SKILLS

- Frontend Development
- Data Structures and Algorithms
- OOPS
- Programming Languages: Java, JavaScript, C, C++.

EDUCATION

B.Tech, Information Technology, 06/2022

Gurunanak Institute of Technology - Kolkata

GPA: 8.92

PORTFOLIOS, LINKEDIN

- Portfolio: <https://priyadev-portfolio.com>
- LinkedIn: <https://www.linkedin.com/in/priya-bhattacharya-6b8b16290/>

CERTIFICATES AND COURSES

- Web Development Course by Internshala, Certificate
- C for Everyone: Structured Programming Course by Coursera, Certificate

ACHIEVEMENTS AND INTERESTS

Consistently maintained the highest CGPA in the entire department to date.

Runners-up in "Code Nerds", a competitive coding event held during Samatva 2K24
